

Wildlife Gardener

How to attract and support beneficial wildlife for a productive edible garden

- Fill out a KWL (Know-Want to Know- Learned) Chart
- Choose an animal from the list below or pick your own animal
- Research and create an **animal profile**, for details see below
- Research why the animal is beneficial for your garden
- How can you attract and support them

- Write **3 papers** about your findings:
 - 1) Shelter (due on March 20th)
 - a) Cover: to hide from predators and bad weather, to hide for hunting prey
 - b) To raise their young

 - 2) Food and water (due on March 27th)
 - a) What food do they need to thrive?

 - 3) How can I provide a habitat for them? (Due on April 3rd)

- Email your research papers to mdavis@madisonschools.k12.mi.us
- We will build native bee nesting boxes later
